

I am currently a member of the IGFSAs Executive Committee and am applying to the IGFSAs membership for another term. As someone who has been involved in the IGF from its conceptualization in the WGIG, I see its potential and remain concerned with its future. Over the years I have seen the burgeoning of the national and regional IGF initiatives and am very pleased that the IGFSAs has been able to help this by providing grants and other support. I believe that the future of the IGF depends on the success of the National and Regional Initiatives and am committed to IGFSAs work in helping to sustain this movement.

I have been a member of the IGFSAs since its formation. As a member of the IGFSAs Executive committee, I have been involved in trying to strengthen its internal structure and its sustainability and in making sure that the IGFSAs remains true to its bylaws and commitments. I remain committed to trying to increase individual membership and individual donations, in addition to the critical corporate donations. I think the membership of the IGFSAs is critical to its success as an organization and believe that we must do more to involve the members in the fund raising activities of the association.

I am a research consultant with a number of contracts with both NGOs and in the technical community. I have served on the UN Working Group on Enhanced Cooperation I (WGEC) and the UN Working Group on Internet Governance (WGIG). I worked as a member the Internet Governance Forum (IGF) Secretariat for five years and was an active member of the IGF Multistakeholder Advisory Group (IGF MAG) for three years. As a technologist I have been involved in the development of Internet protocols and architectures for over 30 years; am co-chair of a Research Group on Human Rights Protocol Considerations in the Internet Research Task Force (IRTF) and a member of the Internet Research Steering Group (IRSG). I have been active in ICANN policy, was chair of the Generic Name Supporting Organization (GNSO) Council and am currently a member of the ICANN Board. I was [awarded](#) the ICANN Multistakeholder Ethos award in 2014 and remain committed to the multistakeholder model and ethos.

I ask you to please consider a vote for my continuing to work on the IGFSAs Executive Committee.
