

Dear IGFSa members

With almost 20 years of work experience and issues related to the Internet and human development, I have become aware of the importance of generating opportunities for discussion in national, regional and global in the general framework of internet governance contribute to improve Internet contributions in development objectives.

My interest in participating in the IGFSa Executive Committee has as its origin and meaning the fulfillment of this responsibility for promoting governance dialogues and that is why my commitment to participate in it is natural.

On the other hand, I consider that it is also appropriate to have a voice and action from Latin America in the Executive Committee and thereby encourage greater participation of people in these discussion spaces.

I am an active member of the Colombian Internet Governance Board and a recurring participant in the regional areas of governance dialogue in Latin America and in the IGF itself.

Eduardo Santoyo
